3 · FOUNDERS

One today, two seats open.

FOUNDER & CREATIVE DIRECTOR

Pete Thickett

PT Live Design, Lincoln. A designer who builds: the app, the brand and the 3D engine are his.

SEAT 1 · OPEN

Operations-focused technical co-founder

A software developer to run delivery and operations while Pete sells. 15 to 20% equity offered, depending on the co-founder's profile. Conversations underway. Funded from the raise.

SEAT 2 · OPEN

Partnerships lead

To convert pilots into paying partners.

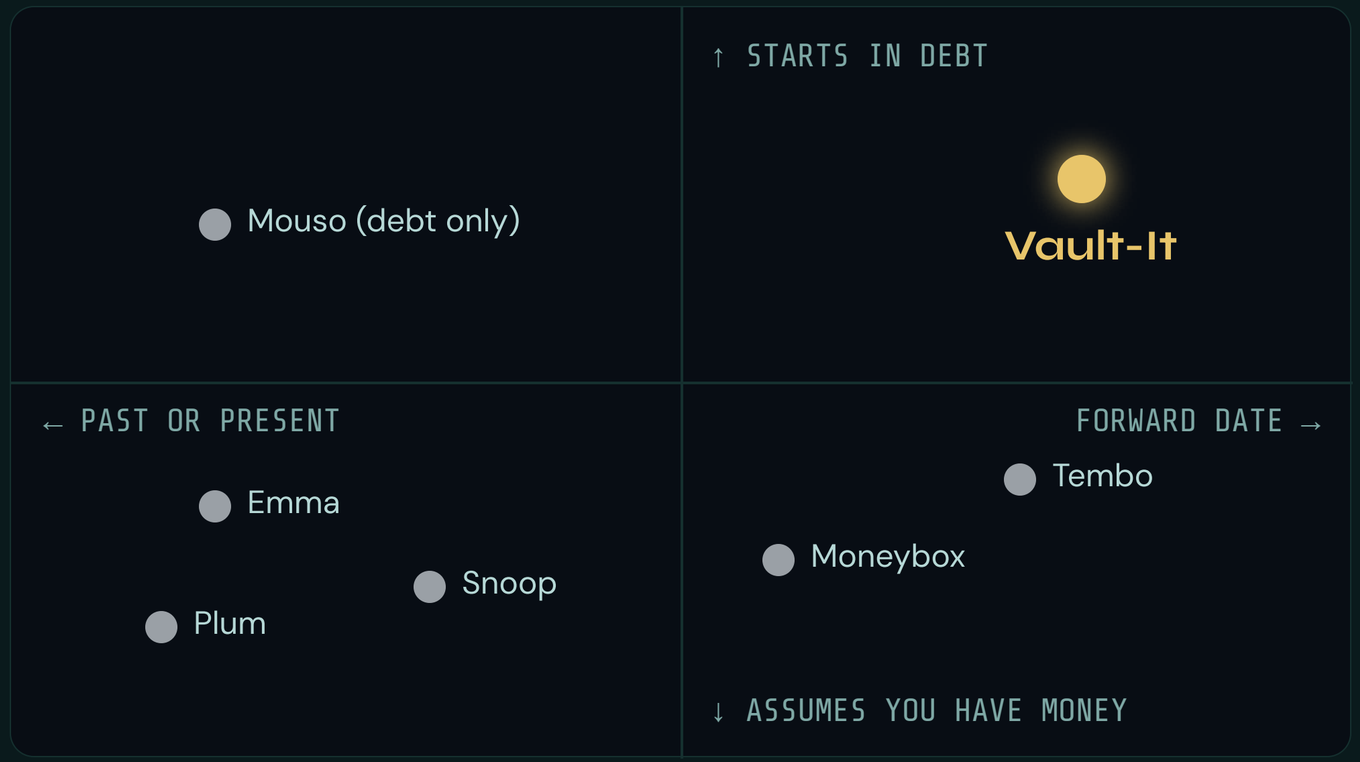

ADVISERS IN PLACE

David Amor (Enso Brain, HelpBnk), neurodiversity and performance · Malcolm McPhee (Business Lincolnshire) · Rita Fortes (Web Summit) · Chris Gueffier (NBV Enterprise Solutions)

Solo founder today, and I'd rather say that than pad the slide.

4 · THE GAP

Nobody starts below zero and gives you a date.

Budgeting apps optimise today. First-time buyer apps assume you already have savings.

Tembo or Moneybox could add a date. Neither starts users in debt.

The idea is copyable in 12 to 18 months, so our defence is brand, speed and partners.

4 · THE PRODUCT

One live date. A home built brick by brick.

Starts below zero

Stage 0 is a starting line, not a failure screen.

One forward number

The keys date recalculates with every payment, saving or debt cleared.

Progress you can see

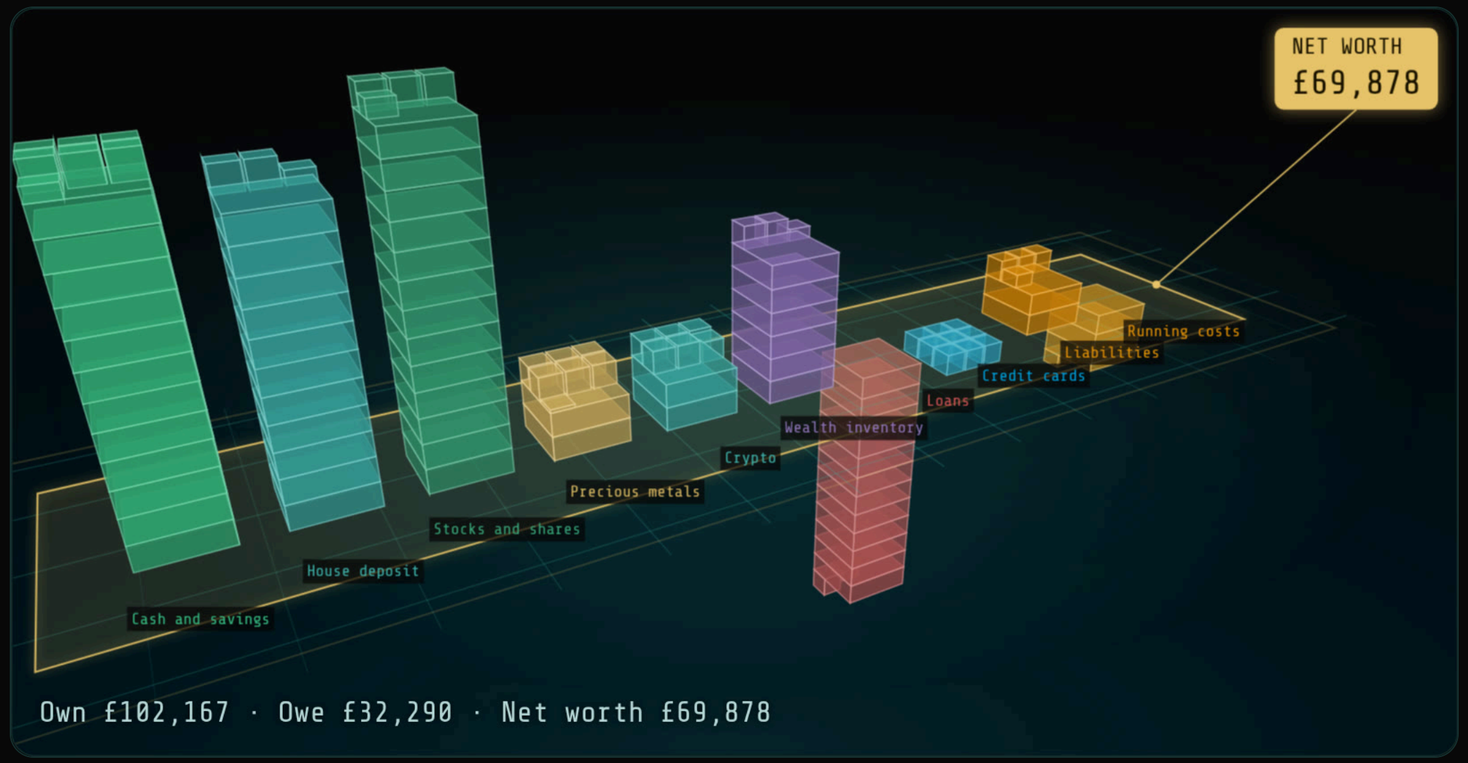

Each pound saved lays real-scale bricks: 14,465 of them in a Victorian terrace, in Flemish bond.

4 · NET WORTH IN 3D

Your whole money picture, as a place you can orbit.

Own above, owe below

What you own stands on the gold line. What you owe hangs below it.

Every pound is a block

Each asset class in its own colour. Debt lifts away as it is paid.

4 · WHY IT GETS MORE PEOPLE HOME

Seeing the future changes what people do today.

See your future self

People shown an aged image of themselves chose to save more (Hershfield et al., 2011).

See your progress

People speed up as a goal gets closer (Kivetz et al., 2006). Forecast blocks show it coming.

We will measure it

Consented, anonymised journeys: time from Stage 0 to Stage 3.
